# FEATURE BUILDING

This 30' x 60' post mount Arch Series building is the third QuickStructures building of this size to be purchased by this satisfied customer. The customer leases space within the buildings to people or companies with storage needs.

The building has a 12' x 12' QuickStructures fabric roll up door and, when completed, will also have a conventional walk in door (purchased locally). Each arch, spaced at 6' on center, is mounted on 6" x 8" treated posts and was enclosed using 2" x 8" lumber.

A less expensive building solution for this customer translates to a reduction in overhead cost and ultimately more profit.
